7th November 2018

Security Task Group Activities

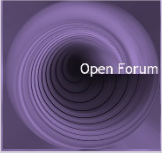

Update to ND1643

- Moving from Certifiable specification to Best practice guide
- Deprecated the previous version

Document Issued (V5.1.1) 21st December 2017

Draft Security Best Practice guide for All-IP Telephony
Stable Draft document produced
Task group approval being sought

Security Task Group Activities

Generic Security Reference

- Asked to review DCMS IoT Secure by Design
- Discussions underway to identify/agree security best practice reference

Proposed update to ND document template

- References to Security Frameworks
- Publicly available best practice/standards

Security Task Group Activities

NICC Public website improvements

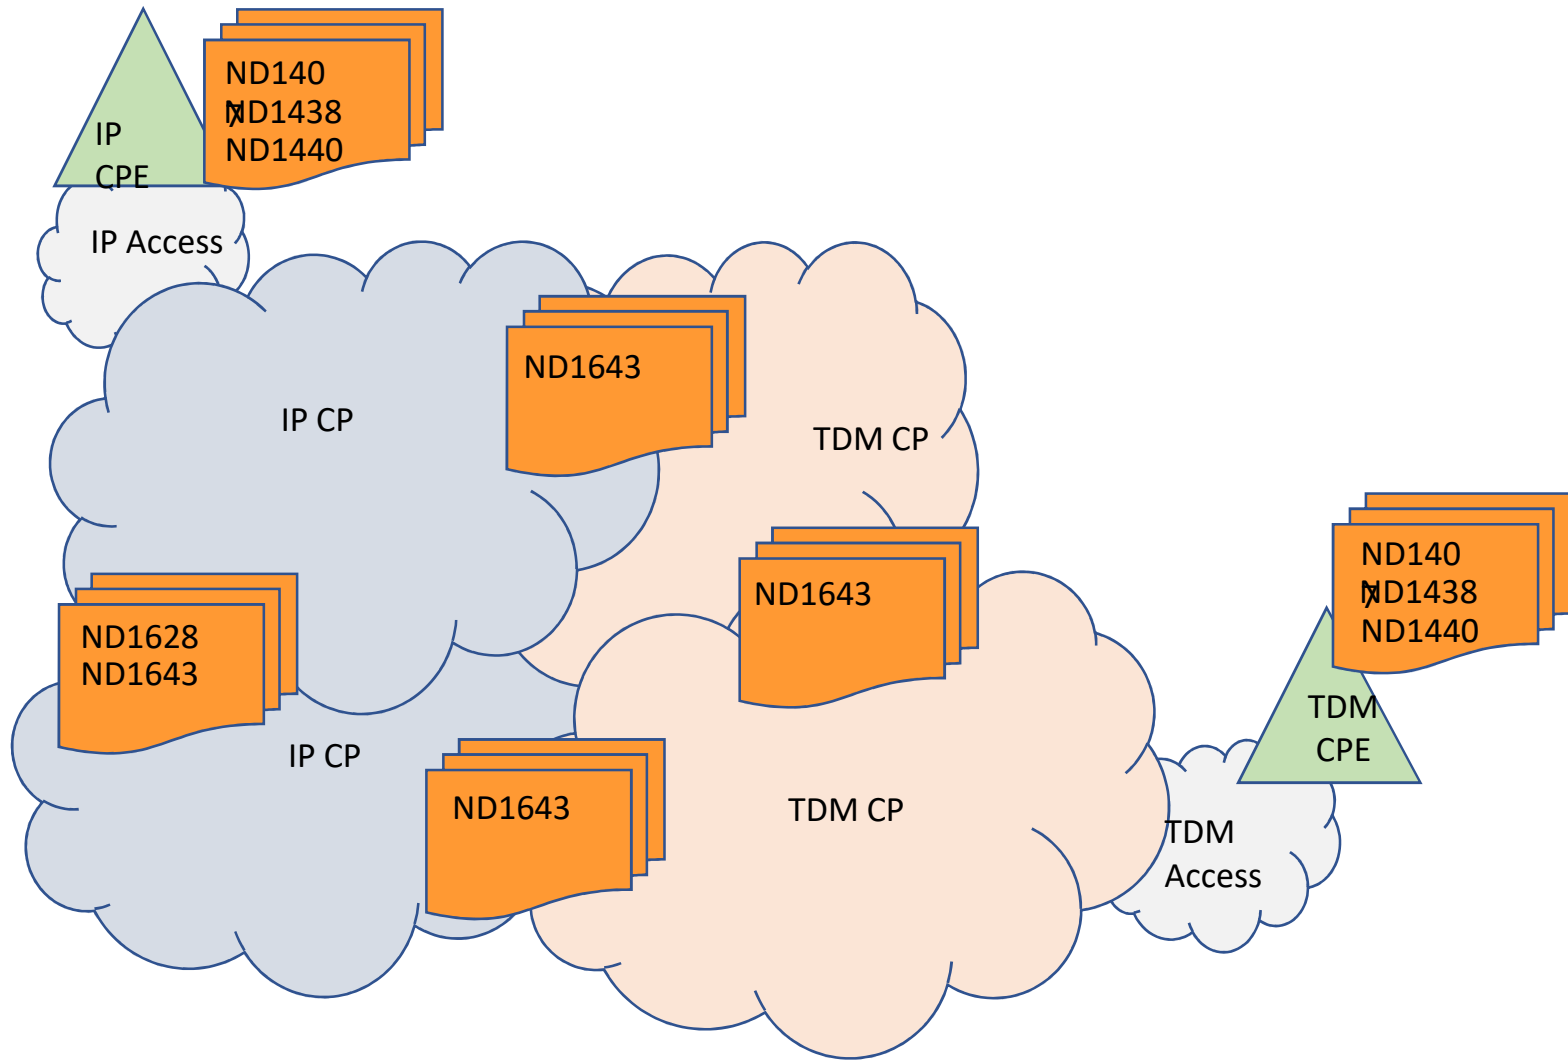

- Add description to ND Index
- Create sub-page to highlight key documents

Security NDs -

- ND1407 - Voluntary Code of Practice for Security of Access to Dial-through Functions in Communications Systems
- ND1438 - Voluntary Code of Practice Mitigating Theft of Service from End User Voice over IP Communications Systems
- ND1440 - Guidance for the use and secure implementation of SIP Application Layer Gateways (ALG)
- ND1628 - Securing Data Flows with IPSec for NGN Interconnects
- ND1643 - Guidelines on the Minimum Security Controls for Interconnecting Communication Providers

Proposed new web page for each topic area – “Security”

Thank You
