16th November 2021

# Emergency Location Task Group

**Pasquale Exius-Genco (BT)**

- The main focus of the Emergency Location Task Group is how we communicate emergency caller location to the agent taking the call
- The European standardised solution is called M493 and if ever implemented aimed to solving this issue across EU nations.
- We have identified around 22 use cases that this could apply to in the UK
- As a group we have been looking at M493 in the context of the UK. Our report ND1519 should be published this year
- Our next steps.....

# Questions?

Thank You
